

Above: Asp Avenue on the corner of Lindsey: Parallel Grate

Above: Lindsey Avenue, westbound between Elm and Chautauqua, North Side, Parallel Grate

Above: Berry southbound, turn lane onto Boyd: Parallel Grate

Above: Looking North on Flood at the southbound lane, sunken grate on west side adjacent to Lions Park and the concrete lined stream channel.

Above: Lahoma and Boyd Street: All 4 corners of Lahoma have Parallel Grates.

Above: Looking west on East Lindsey, eastbound lane between 12th and 24th East in front of the Short Stop gas station. Very large concrete joint that starts in the middle of the lane and runs closer to the curb (1.5 feet off curb) as you travel east. This is a big tire grabber and either this street needs to be completely resurfaced, or this gap needs to be filled until it can be resurfaced.
